

CHEN, ZHAOTING

zhaoting.chen@manchester.ac.uk

EDUCATION

- Ph.D. in Astrophysics** (pending) 2020 - present
Jodrell Bank Centre for Astrophysics, University of Manchester, United Kingdom
Supervisor: Dr. Laura Wolz & Prof. Richard Battye
- Master of Science by Research in Astronomy and Astrophysics (Distinction)** 2019 - 2020
Jodrell Bank Centre for Astrophysics, University of Manchester, United Kingdom.
Supervisor: Dr. Laura Wolz
- Bachelor of Science in Physics** 2015 - 2019
School of the Gifted Young, University of Science and Technology of China, P.R. China.

EXPERIENCE

- Research Assistant** 2017 - 2019
CAS Key Laboratory for Research in Galaxy and Cosmology, USTC.
Supervisor: Prof. Yi-Fu Cai
Project: Forecasting Constraints on Dipole Asymmetry during EoR. Co-supervised by Prof. Yi Mao from Tsinghua University.
- Teaching Assistant** 2018
Department of Astronomy, USTC.
Course: Space and Time (Introductory Gravitational Physics)
- Research Assistant** 2018 - 2019
National Astronomical Observatories of China, Chinese Academy of Science.
Supervisor: Prof. Yidong Xu, Prof. Yougang Wang and Prof. Xuelei Chen
Project: Morphology of Reionization in Island Model.
- Visitor** 2019
Kavli Institute for the Physics and Mathematics of the Universe, University of Tokyo.
Invited by Dr. Wentao Luo
Project: Weak Lensing in Minimal $f(T)$ gravity. Also with Prof. Yi-Fu Cai and Prof. Manos Saridakis.
- Visitor** 2019
Institute for Astronomy, Stockholm University
Invited by Prof. Garrelt Mellema
Project: Ionizing Background during Epoch of Reionisation. Also with Dr. Sambit Giri.
- Teaching Assistant** 2020-
Department of Physics and Astronomy, University of Manchester.
Course: PHYS10071 Mathematics 1; PHYS10191 Introduction to Astrophysics and Cosmology; PHYS10352 Properties of Matter; PHYS10372 Mathematics 2.

RESEARCH INTERESTS

Intensity Mapping. It's the main focus of my PhD. I'm a member of the SKA cosmology group working on the theory side of it.

Cosmic Reionisation. I'm mainly interested in the morphology of Cosmic Reionisation and how to use it to interpret semi-analytical models of EoR.

Weak Lensing. I'm mainly interested in using weak lensing to constrain modified gravity.

Astrophysical Computing. I work a bit on development of `halomod` and `IslandFAST`.

TALKS

- | | |
|---|-------------------|
| 1. Halo Model, Interferometric Intensity Mapping and HI Shot Noise | 09/2020 |
| SWIFAR Colloquim | Yunnan University |

LANGUAGES

I am interested in the phonology of Sinitic languages and speak a few myself. A list of languages I speak, in the order of my proficiency:

- Huzhounese. It's a dialect of Taihu Wu which belongs to the linguistic group of Wu Chinese. Native.
- Standard Mandarin. Native.
- English. Fluent.
- Shanghainese. Fluent.
- Standard Cantonese. Intermediate.
- Amoy Hokkien. Amateur.
